

# GREASE TRAP

# Deluxe 4" Rack System

## Installation Instructions

1. Use a marker to draw a line at the lip of the fan.

2. Install the Deflector Shield approximately  $\frac{1}{4}$ " above the line drawn in step 1.

3. Note the Deflector Shield in respect to the line drawn.

4. Install the white rack, making sure to leave room for the box..

5. Always install screws on both levels to insure stabilization of the **Grease Trap Rack System**.

6. Place box in rack, making sure that the drain hole is facing out.

7. Place the filter in the box, creating a valley for the grease to fall into and tucking in the corners.

8. Place the lid on the front of the box.

9. Clamp down both clamps, securing the lid.

### Tools Needed

- Cordless Power Drill
- $\frac{3}{8}$ " Hex Bit & Phillips Bit
- Tape Measure
- Permanent Marker
