

## GREASE TRAP

# Deluxe 7" Rack System

## Installation Instructions

1. Use a marker to draw a line at the lip of the fan.

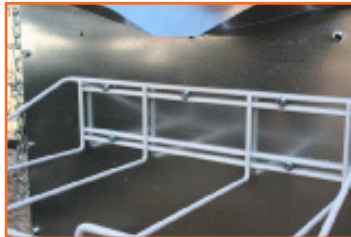

2. Install the Deflector Shield approximately  $\frac{1}{4}$ " above the line drawn in step 1.

3. Note the Deflector Shield in respect to the line drawn.

4. Install the white rack, making sure to leave room for the 4" or 7" box..

5. Always install screws on both levels to insure stabilization of the **Grease Trap Rack System**.

6. Place box in rack, making sure that the drain hole is facing out.

7. Place the filter(s) in the box. One filter for 4" and two filters for 7".

8. Create a valley in the filter for the grease to fall into. Also make sure corners are tucked in.

9. Place the lid on and clamp in place.

### Tools Needed

- Cordless Power Drill
- $\frac{3}{8}$ " Hex Bit & Phillips Bit
- Tape Measure
- Permanent Marker
